

Dear Colleague,

With the National Elections approaching and particularly branch meetings to decide nominations for those, I have decided to put myself forward for a position on the Telecoms & Financial Services Executive. I have 20 years of union experience in representing members and have held positions ranging from branch representative through, committee, Chair and ultimately Branch Secretary. I have also represented members at above branch level both regionally and at national forums for many years. I am currently the Branch Secretary of the Central Counties & Thames Valley branch and "Joint", Single Point of Contact for Openreach for London & Home counties region. I have been honoured to hold these positions and have treated them with the utmost respect, I believe "if a job is worth doing it's worth doing well", an attitude I would carry on to the executive role.

You will be keenly aware that in the last year we in the CWU faced a range of circumstances which presented us with some challenging and difficult choices these required a strong and united leadership. These have not gone away and I believe now and in the future we need a strong rational group who with dialogue and consultation with both branches and members can provide this.

I strongly believe that I can influence the current and future debate utilising my experience, honesty and cogent views. I therefore seek your branch nomination and welcome any calls, contact numbers below, to speak with you or at any Branch meetings you plan.

Regards
Chic
